OFFICIAL PROPOSAL
Centralized API Management & Monitoring Platform

Prepared For:
IIS (Deemed to be University), Jaipur

Prepared By:
Himorix Technologies

1. Project Overview

To enhance efficiency, scalability, and centralized control of all IIS group websites, we propose the development of a Centralized API Management & Monitoring Platform. This platform enables seamless integration, monitoring, and management through a unified dashboard.

2. Objective

Our aim is to design a centralized monitoring and management layer that will:

- Track API activity, logs, and system events in one place
- Provide real-time monitoring through dashboards and alerts
- Manage integrations across multiple branches securely
- Maintain clear documentation for long-term scalability and maintainability

3. Proposed Solution

To ensure the platform is built correctly and future-ready, we recommend a structured phased approach before full implementation.

4. Project Phases & Workflow

Phase	Focus	Outcome
Discovery	Review CRM, APIs, endpoints, integrations, and data flows	Architecture plan, API documentation, wireframes, risk assessment
POC (Proof of Concept)	Build a working prototype of the monitoring panel	Validate architecture, logging system, dashboards and alerts
Full Development	Complete platform implementation	Scope, timeline, and effort finalized after Discovery & POC

5. Estimated Timeline

Phase	Duration
Discovery	1–2 Weeks
POC (Proof of Concept)	2 Weeks
Full Development	2–4 Months

6. Key Features

- Centralized API Management Dashboard
- Real-time API Logs & Monitoring
- Centralized Faculty Data (All branches in one place)
- Single CRM Panel for all branches
- Website Activity Tracking & Monitoring
- Traffic Analytics & Performance Insights
- Domain & Hosting Information Management
- Centralized System for all digital assets
- Security Monitoring & Threat Detection
- Server & Infrastructure Status Tracking

7. Price Details

Plan	Cost
Monthly Plan	₹24,000
Yearly Plan	₹2,88,000
Discount	₹5,000
Final Yearly Cost	₹2,83,000

8. Collaboration & Communication

We believe strong collaboration is key to the success of projects like this. You are most welcome to visit our office for a detailed walkthrough, or we can visit your location if that is more convenient. This helps both teams align clearly on architecture, workflows, and expectations.

9. Support & Maintenance

Monitoring, bug fixes, optimization, upgrades, support
